

THE JOB: DEVOPS ENGINEER

AWH, a 23-year old software engineering firm, is looking for a GREAT! devops pro to help our current team deploy faster, better, and cleaner.

- Handling code deployments
- Testing implemented designs
- Building and testing automation tools
- Creating and monitoring best practices, metrics, and processes
- Suggesting improvements

Since we build every kind of software imaginable, you'll never be bored with the same-old-same-old. Over the last six months we've deployed:

- IoT devices
- Web applications
- Phone apps
- APIs

Here are some of the language and database skills you should have:

- Networking skills (understanding of DNS, troubleshooting skills)
- Linux administration (Ubuntu, Redhat, CentOS)
- Databases (MSSQL, MySQL, Postgres, Redis)
- Docker (writing Docker files, creating Swarms, and Kubernetes clusters)
- Languages (.net, .net core, Ruby, PHP, Python)
- Azure (web apps, DB's)
- AWS (EC2, SES, SNS, EBS, S3,ECS)
- Configuring CI (Jenkins, Team City, VSTS)

BE GREAT

Build Great Digital Products

Basic life (and job) skills you'll need include a winning personality, communication and organizational skills, and the ability to handle the pressure of a rollout gone wrong at 11 pm on a Saturday night. Tattoos are optional. T-shirts referencing obscure nerd-speak mandatory.

Salary is \$50-\$60k-ish with excellent full-time benefits and a liberal PTO policy.

Our company is growing, and we'd like you to join our team of smart, intellectually curious, and funny nerds. To apply, ping Aunt Robin at robin.walters@awh.net.
